Odor & Stain Eliminator **E-40**

Consume the Problem. Don't Mask It!

General Description:

E-40, Odor & Stain Eliminator is a three in one, ready to use formula that eliminates objectionable odors and stains in household, institutional, and industrial settings. **E-40** acts as a tremendous carpet pre-spray, spotter, a deep clean for heavy traffic areas and as an additive for carpet extraction.

E-40 rapidly *digests* the odors and stains. It is not a maskant. Its formula consumes the organics that cause darkness and soiling commonly found on carpeting and upholstery. The formula is safe for all fabrics, including satins, wools etc. **E-40** contains no hazardous, toxic or polluting ingredients in its formula whatsoever.

- A proven chemical formulation instantly binds odor & stain causing molecules.
- A proprietary microbial consortium destroys the bound odor molecules.

This combined chemical and microbial effect makes **E-40** a powerful yet safe and environmentally friendly odor controller.

Historically, odor control usually involves the application of perfumes or odor maskants that do not eliminate odor, and contain a nerve deadening agent for one's nose. But, in fact these treatments increase malodors by adding another less objectionable odor to overpower the other.

In the case of stains and extraction, **E-40** also contains sophisticated, non-resoiling cleaning capabilities designed specifically for carpet and upholstery stain removal. Its safe formula will never harm or bleach the material it is working on. It gets to the root of the problem, by *consuming* organically based odor and stain-causing matter upon contact. The microbes work until there is no organic matter left to consume and then die off leaving behind only CO₂ and H₂O as its sole by-products.

E-40 is non-perc, non-aerosol, non-toxic, non-hazardous and completely CFC-free, making it safe for human inhalation, the ecosystem and to the ozone layer.

Directions of Use:

For Odor Control (Undiluted/RTU):

Spray **E-40, Odor & Stain Eliminator** on the area with the offensive odor you wish to eliminate. Let stand. Repeat if necessary after 24 hours. In cases of well established, absorbed odors on porous surfaces, spray healthy portion of **E-40** on area, scrub with abrasive pad and let stand. Repeat if necessary.

For Stain Removal (Undiluted):

Apply small amount of **E-40** directly onto stain to be removed. Agitate area with clean brush, pad or rag. Remove excess. In severe cases, let stand overnight and allow the microbes to consume organics causing the stain. Repeat if necessary.

For Carpet Pre-Spray (Undiluted):

Using a (garden) sprayer, mist the area with the undiluted formula. After area is well coated, one can then use a bonnet machine or brushes to agitate area. Then extract, using EcoLogic Solutions' N-14, All Purpose Cleaner. **E-40** is also highly effective as a treatment for heavy traffic areas.

For Carpet Extraction:

Use up to 7:1 dilution and un-diluted as a pre-spray on the worst areas.

Applications:

- Carpet, Upholstery, Drapes & Bedding
- Cigar, or Cigarette Smoke Areas or Rooms.
- Trash or Laundry Bins.
- Carpet Pre-Spray.
- Heavy Traffic Areas.
- Carpet Shampooing or Extraction Additive.
- Locker Areas.
- Bathrooms.
- Problem Fly Areas.
- Mildew Areas.
- Pet Areas and Facilities.

Clean Without Compromise!
